

Floating flooring

1. Floor slab
2. Isolmant flanking strip
3. Levelling layer
4. Isolmant resilient mat
5. Fascia Perimetrale Isolmant (Tecnica Reticolata or Tecnica Doppio Spessore)
6. Screed
7. Underlay IsolDrum (Silver or N or Film or St Blu or LVT or LVT Plus)
8. Floating wooden floor

Description

The floating wooden flooring, or dry installation, is increasing popular thanks to its ease and efficacy. Isolmant IsolDrum products are engineered mats which can combine acoustic, mechanical and thermal characteristics both for floating wooden and laminate floorings. Isolmant IsolDrum mats meet the requirements of drum sound reduction and impact sound insulation, that is they reduce both reflected sound within the room, and transmitted sound into the room below. The floating floor solution is very useful in refurbishments thanks to its very low thickness.
