

# External wall insulation

1. Plaster
2. External wall leaf
3. Mortar
4. Isolmant fiber panel (Perfetto Special)
5. Isolmant Fascia Tagliamuro
6. Inner wall leaf
7. Plaster

## Description

Isolmant fiber panel such as Perfetto Special (Ex BV) achieve high performance of thermal insulation thanks to his low thermal conductivity. Panel should be placed continuously between the two leaves of masonry of the cavity wall. The product is made of recycled and regenerated fibres, and are nontoxic, ecological, with unlimited duration even in case of moisture.
