

Underscreed application

1. Floor slab
2. Isolmant flanking strips
3. Levelling layer
4. Resilinet mat Isolmant D311
5. Fascia Perimetrale Isolmant (Tecnica Reticolata or Tecnica Doppio Spessore)
6. Screed
7. Finishing

Description

Thermal insulation of a floor can be enhanced by installing a panel of insulating material with low thermal conductivity, in addition to an acoustic mat. Isolmant D311 is a panel that ensures both high thermal and acoustic insulation. Due to its low dynamic stiffness, high levels of impact sound reduction are guaranteed. The upper side of the panel is bounded to an aluminate embossed film to provide anti-tearing resistance.
